

Quick Start EVK-7 / EVK-8

1. Overview

2. Setup

1. Download the EVK-7 or the EVK-8 software (and documentation) from www.u-blox.com/evk-downloads and install the software. See installation notes on back of card.
2. Connect the unit to a PC. Options:
 - USB: Connect via USB port (G). (The USB driver installs automatically when the device is connected to a PC - requires internet connection).
 - UART: Connect via RS232 (F). Set switch (B) to I2C
 - SPI / I²C compliant DDC: Connect pins (C). Set switch (B) to SPI or I2C.

NOTE: Press the RST (E) after changing the switch (B).

3. Provide power to the device at all times, either via USB on the back (G) or the V5 IN pin (D) on the front.
4. Connect the GNSS antenna to the evaluation unit (A) and place the antenna in a location with good sky view. For best performance, use an active antenna or external LNA (when connecting to a GNSS simulator).
5. Start the u-center GNSS evaluation software and select the corresponding COM port and baud rate.

3. Kit includes

- EVK-7 or EVK-8 unit
- USB cable
- GPS / GLONASS antenna with 3 m cable
- Extra battery RENATA CR2450

4. Interfaces

With the EVK-7 and EVK-8, all interfaces on u-blox 7 / u-blox 8 chips and supported modules can be evaluated. The evaluation unit provides a Micro USB connector for communication and powering the device, as well as a UART connector for connecting to the COM port of your PC.

SPI and the I²C compliant DDC interfaces are designed to allow communication to a host CPU.

5. Installation

Notes for downloading the EVK-7 / 8 software package and running the installation:

- An Internet connection is required. Windows operating systems are supported (x86 and x64 versions of Vista, 7, 8, 10).
- Choose a package: “Software only” or “Software and documentation”.
- Unzip the downloaded file, go to the Tools folder, and open the u-center zip file.
- Run the extracted u-center exe file and follow the installer instructions.
- When the installation is complete, you will find a u-center menu under the Windows Start button, *All Programs > u-blox*
- To uninstall the software, go to Control Panel and remove the u-center program and “Windows Driver Package – u-blox AG (ublox-usb) Ports”.

6. u-center

The u-center GNSS evaluation software provides a powerful tool for evaluation, performance analysis and configuration of u-blox positioning products.

7. More information

NOTE: Refer to recommendations in the EVK user guide when using the EVK-7 / 8 with a GNSS simulator.

For more information regarding the EVK-7 and EVK-8, contact your nearest u-blox support: www.u-blox.com/en/contact-us-support.html
